ReactJS	★★★★★★
Redux/RTK	★★★★★★
TypeScript	★★★★★★
Git	★★★★★★

Languages

Ukrainian	★★★★★★
English	★★★★★★

I'm a proactive problem solver with skills in React JS, JavaScript, HTML, and CSS. I also have knowledge of algorithms and data structures, as well as experience with programming languages such as C++ and Python. Additionally, I have developed applications using various APIs. I have been studying front-end development for about a year and have completed my own pet projects and participated in a start-up project. I quickly adapt to new technologies and constantly strive to learn. My ability to work collaboratively in a team, communicate effectively, and write efficient code enables me to be productive in any environment. I write structured, clear, and scalable code. My approach to problem-solving includes thorough analysis and research, enabling me to find effective solutions.

Work History

2023-01
- present

ReactJS Developer
TechGen (Start-up), remote
